

UNIVERSALLY ATTACHABLE STEP RUG

ABSTRACT

A rug for use on a step of a depth less than the width of the rug includes sets of male and female snap locks for engaging an edge of the rug to the surface of the step. Similar sets of snap locks are attached to an opposed edge of the rug for attachment to a riser supporting the step.

- 5 Sets of hook and loop fasteners may be disposed on opposed edges of the rug intermediate the snap locks to secure the edges to the respective step and riser. Because of the overlap feature of the rug that extends onto the riser, the rug is capable of covering steps of different depth.
